

Science Skills Song

sung to "she'll Be Coming 'Round the Mountain"
IF you do investigations, don't forget
That you must OBSERVE, INFER, and PREDICT.
CLASSIFYING and COUNTING,
ESTIMATING and MEASURING
Are some skills that we use to investigate.

There are several more to add before we're done.
MAKING MODELS surely is a lot of fun.
COMPARING objects or events,
In order to make any sense,
OPERATIONAL DEFINITIONS aren't intense!

Scientific Method

Promptly - Problem

Run - Research

Home - Hypothesis

Eating - Experiment

Chewy, Goopy, soft, Delicious - Collect, Graph, Study Data

Cookies - Conclusion
